			ART UNIT	PAPER NUMBER
			2145	
		MAIL DATE	DELIVERY MODE	
		01/08/2008	PAPER	

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/881,331	Applicant(s) BOARD ET AL.
	Examiner AJAY BHATIA	Art Unit 2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(o).

Status

1) Responsive to communication(s) filed on *21 November 2007*.
 2a) This action is **FINAL**. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 96-177 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 96-177 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on 05 October 2001 is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date _____

4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date _____
 5) Notice of Informal Patent Application
 6) Other: _____

Response to Arguments

Applicant's arguments filed 7/16/2007 have been fully considered but they are not persuasive. Applicant argues that the prior art fails to teach an user-designated template, but in reviewing applicant's arguments it appears applicant has specific definition of template which has not been included in the claims presented. Examiner has reviewed applicant argument on page 40 dated 7/16/2007 and it appears that applicant has a specific template type in mind, examiner would like to note that at presently claimed invention does not specify claim language that would require this specific template to be used, therefore the user-defined template is interpreted by the examiner as broadly as possible in light of the specification.

Applicant's arguments with respect to claims 96-177 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

The drawings were received on 10/5/2001. These drawings are accepted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 96-177 are rejected under 35 U.S.C. 102(e) as being anticipated by Scimone et al. (U.S. Patent 6,647,410)

For claim 96, **Scimone** teaches, a network-based system for providing data to a requesting user, comprising:

 a communications device of the requesting user configured to accept an order for user-ordered data from the requesting user; (**Scimone**, Col. 5 lines 35-55, pda, Col. 9 lines 4-14, outlook)

 and a server node configured to receive the order from the communication device to receive a data feed from an external data source, and to transmit to the communication device stripped data which is stripped from the data feed in compliance with the order, said order comprising an alert criteria which comprises: (**Scimone**, Col. 12 lines 1-15, Market feed)

 an identified data state and condition, designated by the requesting user; (**Scimone**, Col. 8 lines 6-26, alert)

 and an association between each of a plurality of specific field values of the identified data state and condition, and a plurality of respective selected display templates selected from a plurality of available display templates, said association established according to a designation by a template-selecting user of each of the plurality of specific field values, and a selection by the template-selecting user of each respective selected display template associated with each specific field value wherein

each of the plurality of specific field values has an associated respective selected display template; (**Scimone**, Col. 13 lines 35-65, watch list, sub view)

wherein the server node is configured to identify in the data feed a specific stripped field value matching a specific field value of the plurality of specific field values of the identified data state and condition; (**Scimone**, Col. 11 lines 24-56, add-in)

wherein the server node is configured to transmit the stripped data containing the specific stripped field value to the communication device of the requesting user in a presentation format personalized according to the respective selected display template associated with the specific stripped field value of the identified data state and condition; (**Scimone**, Col. 12 lines 51-67, add-in, fields)

and wherein the communication device is configured to render the stripped data in the presentation format of the respective selected display template associated with the specific stripped field value to the requesting user. (**Scimone**, Col. 13 lines 35-50, watch list)

For claim 97, **Scimone** teaches, the network-based system of claim 96, further comprising a mass data storage repository accessible to the server node configured to store at least **one of**:

the stripped data;

the order received from the communications device of the requesting user;

the alert criteria received from the communications device of the requesting user;

(**Scimone**, Col. 8 lines 6-26, alert)

the respective selected display template;
and the association between each of the plurality of specific field values of the identified data state and condition, and the plurality of respective selected display templates selected from the plurality of available display templates.

For claim 98, **Scimone** teaches, the network-based system of claim 96, further comprising an instance of software executing on the server node configured to accept a requesting user profile with requesting user account data from the communication device, to accept the order for the user-ordered data from the communication device of the requesting user; (**Scimone**, Col. 17 lines 35-60, stock)

stripping the stripped data from the data feed in accordance with the specific field value of the identified data state and condition, and to determine the association between the specific stripped field value and the respective selected display template. (**Scimone**, Col. 17 lines 35-60, stock, bid, ask)

For claim 99, **Scimone** teaches, the network-based system of claim 96, wherein the communication device of the requesting user comprises a wireless communication device. (**Scimone**, Col. 5 lines 35-55, wireless)

For claim 100, **Scimone** teaches, the network-based system of claim 99, wherein the wireless communication device comprises at least **one of** a one-way pager, a two-way

pager, a hand-held computing device, a PDA, or a Web-enabled telephone of the requesting user. (**Scimone**, Col. 5 lines 35-55, pda)

For claim 101, **Scimone** teaches, the network-based system of claim 96, wherein each display template of the plurality of available display templates comprises a type of field value and an associated data presentation format to be transmitted to the communication device of the requesting user in response to the alert criteria. (**Scimone**, Col. 18 lines 9-26, limit)

For claim 102, **Scimone** teaches, the network-based system of claim 96, wherein the stripped data transmitted to the communication device of the requesting user comprises a most-recent real time value associated with an alert triggered through detection of the identified data state and condition associated with the alert criteria. (**Scimone**, Col. 4 lines 1-15, realt time)

For claim 103, **Scimone** teaches, the network-based system of claim 96 wherein the data is financial data, wherein said financial data comprises at least **one of** stock news, stock data, stock market news, stock market data, stock prices, interest rates, commodity rates, money market rates, financial institution data, financial institution news, financial market data, financial market news, or publicly oriented financial activity and news information. (**Scimone**, Col. 11 lines 21-45, stock)

For claim 104, **Scimone** teaches, the network-based system of claim 103, wherein the respective selected display template is a financial display template comprising at least **one of** a type of financial field value or a financial data presentation format transmitted to the user in response to a financial data alert criteria. (**Scimone**, Col. 18 lines 9-26, limit)

For claim 105, **Scimone** teaches, the network-based system of claim 104, wherein the financial data alert criteria comprises an identified financial data state and condition of a financial data feed from a financial data source; (**Scimone**, Col. 12 lines 1-15, Market feed)

and wherein the financial alert criteria further comprises an association between each of a plurality of respective specific financial field values of the identified financial data state and condition, and a plurality of respective selected financial display templates selected from a plurality of available financial display templates. (**Scimone**, Col. 18 lines 9-26, limit)

For claim 106, **Scimone** teaches, the network-based system of claim 105, wherein the identified financial data state and condition comprises at least a value, a change of value, or a news event for a selected stock, and wherein the financial alert criteria further comprises an association between a specific value, change of value, or news event for the selected stock and a respective selected financial display template. (**Scimone**, Col. 18 lines 9-26, limit)

For claim 107, **Scimone** teaches, the network-based system of claim 96, wherein the network is the Internet network. (**Scimone**, Col. 4 lines 22-31, internet)

For claim 108, **Scimone** teaches, the network-based system of claim 107, wherein data transmitted to the communication device of the requesting user is transmitted over a cooperating interfacing network comprising a paging network, a digital wireless network, or a wireless Internet service network. (**Scimone**, Col. 5 lines 35-55, wireless)

For claim 109, **Scimone** teaches, the network-based system of claim 96, wherein server node further comprises means for parsing the data feed and converting the data feed into eXtensible Markup Language (XML) for internal data processing. (**Scimone**, Col. 12 lines 1-15, xml)

For claim 110, **Scimone** teaches, the network-based system of claim 96, wherein the order further comprises a conditional alert, a time-sensitive alert, or an event-driven alert. (**Scimone**, Col. 8 lines 6-26, alert)

Claims 111-177 address the same invention listed in claims 96-110. Therefore, the supporting rationale of the rejection to claims 96-110 applies equally as well to claims 111-177.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached Notice of references cited (if appropriate).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay M. Bhatia whose telephone number is (571)-272-3906. Also any interview requests should be faxed directly to the examiner at (571)-273-3906. The examiner can normally be reached on M-F 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)272-3933. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
